# WE ARE

**RANJAN GUPTA**  
Managing Director

Enerdyne represents world's leading manufacturers, bringing technology and innovation from across the globe to the emerging market of India.

We facilitate business and create value by connecting people, creating efficient supply chains, linking resources, offering product expertise and application support. Our sales teams work with some of the largest enterprises in India and are experts in developing services and solutions. They recognize that their job lies in solving problems and not just selling products!

The world has shrunk into a global village. Information is easily available, distances no longer daunting. Speed of business grows faster. Yet, in this era of high technology, there are things that remain timeless – Trust, Quest for Quality and Expertise, Passion to Serve and Excel – these remain vital to the world of business. To succeed in the market, a great product still needs a team of passionate, committed and qualified people who will take responsibility, paying attention to every stage of execution till results are delivered.

At Enerdyne, this human touch is where we excel. Though most rigorous systems and processes are deployed within the company, we still measure our success by the sterling quality of relationships that have been forged over the years with our customers, suppliers and business affiliates and the solidity of trust they repose in us.

# 02 VALUE CREATION

## BRINGING GLOBAL INNOVATION AND TECHNOLOGY TO INDIA

Partnering with some of the world's leading manufacturers of components and systems, Enerdyne brings global innovation and technological evolution to India's large and rapidly developing automotive, electronics and other industrial enterprises. Our comprehensive global network ensures a constant flow of new products, solutions and services for our customers.

## CO-DESIGN & DEVELOPMENT

Innovation, creativity and co-development is continuously fostered through close collaboration between key resources in R&D, purchase, production and engineering. The vast technical and production capabilities of our supply partners offer great scope for design and development of new products to meet market requirements.

## OPERATIONAL EXCELLENCE IN SUPPLY CHAIN MANAGEMENT

Effective supply chain management is a major issue in today's industrial world. Enerdyne plays an effective role in managing complex supply chains under constantly fluctuating demand and supply conditions. Maintaining adequate inventory levels, finding ways to reduce freight and storage costs, applying robust data management, ensuring continuous information flows, reducing pressure and increasing efficiency across supply chains is our focus area for operational excellence.

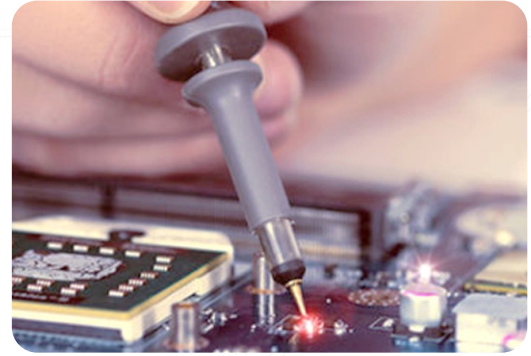

## PAN INDIA SALES NETWORK

Enerdyne has a long history of over 25 years. Our sales network covers entire India, offering an integrated, ready-for-action platform that can handle marketing, sales and services functions for our overseas supplier partners looking to access this rapidly growing market.

# 03 OUR BUSINESSES

## COMPONENTS & PARTS

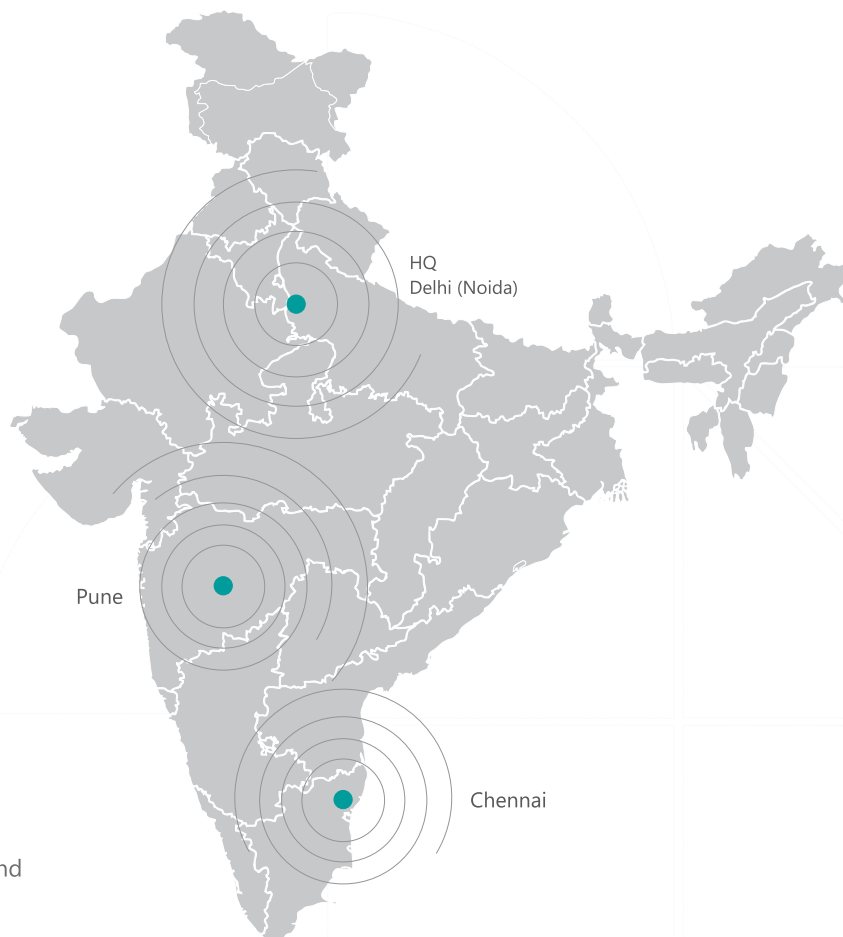

- We represent globally reputed manufacturers of electronic and electrical parts, including automotive applications.

## AUTOMATION & INTELLIGENT SOLUTIONS

- Solutions for automated, smart factories – using the latest in data analytics, IoT enabled devices, artificial intelligence, and robotics.

# 04 OUR REACH

Enerdyne sales network has Pan India reach, covering all major hubs of automotive and industrial manufacturing

# OUR PRESTIGIOUS CUSTOMERS

# 06 GIVING BACK

Major share of our profit goes towards giving back to the world. Enerdyne works with 'The Khidmat Foundation' in India, closely supporting its 'GIVE FOOD PROJECT'.

Thousands of hungry people are fed every day from The Khidmat Foundation's free kitchens. Volunteering in the cooking, serving and cleaning process is a form of active spiritual practice, the practice of service or Sewa.

The service asks no religious affiliation what-so-ever of its recipients. Man, woman, colour, caste and community - people here are fed regardless of how

they fit into any of the mentioned classifications.

Food is provided "from the community for the community". Anyone who is hungry can eat in the langars. Daily meals are served through the "food for soul" program. Cooked food is provided through three centres in India, throughout the year.

“bringing people together  
making business happen.”
